

Greetings from Juneau!

This is the home where I
am living for the 2000-
2001 school year.

This is the view from both the University of Alaska, and from my church. It is looking out over Auke Lake at the Mendenhall Glacier.

To the right: View of Auke Lake from campus and church. Below: I am holding glacial ice by Herbert Glacier.

To the right: The MAT students on campus.

To the left: The coast of Juneau

To the right: About to go river rafting by the Mendenhall Glacier. The water is very cold!

My first time kayaking!
(And hopefully not my last!)
I love it!!!

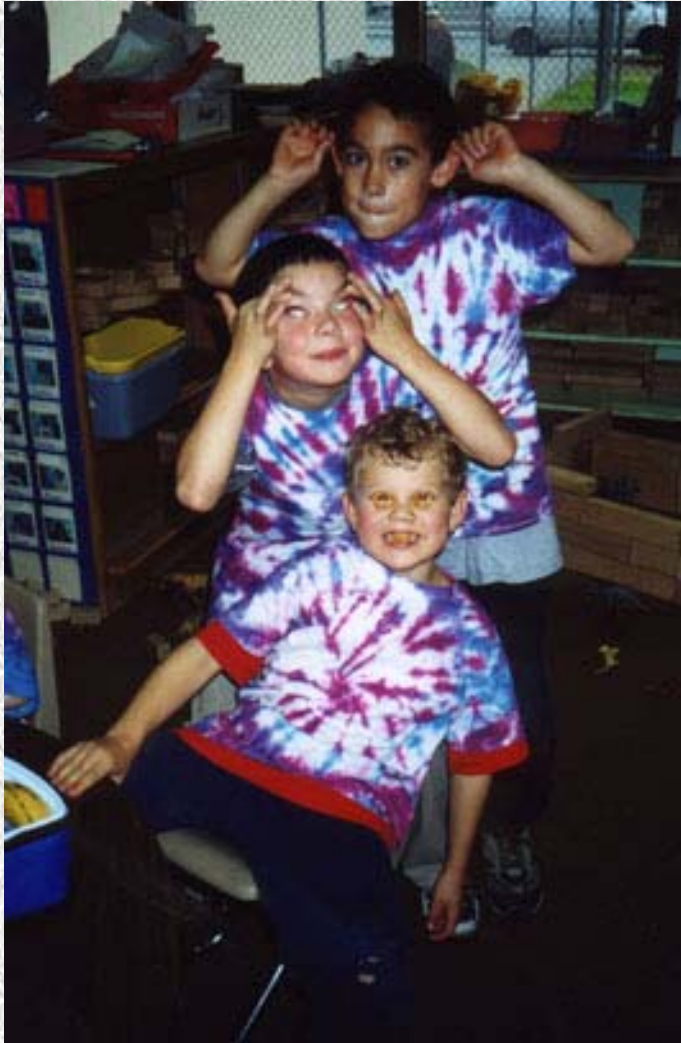

On a boat
going by my
first
iceberg!

(In the
Tracy Arm
Fjord.)

Enjoying our class shirts! (grades K-1-2)

A few of my friends and I.

Giving my 2nd math lesson. The lesson is on counting by tens.

Fruit Loop Math

The way math should be: Ready to be eaten!

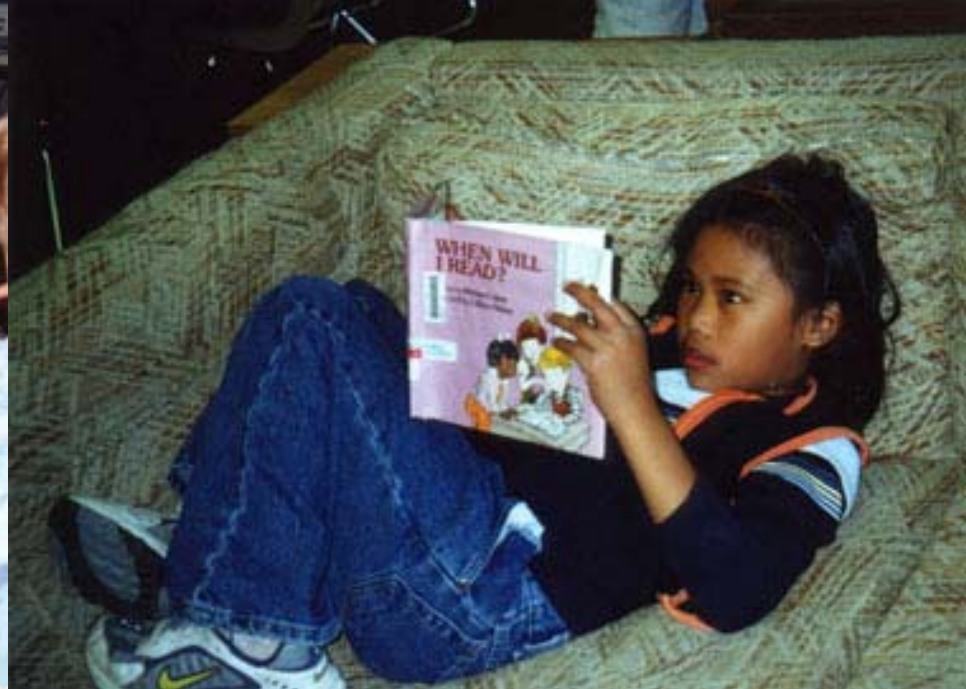

The image displays three maps of the Juneau area, Alaska, illustrating changes over time. The top-left map is a historical map from the 1890s, showing the city of Juneau and surrounding areas. The bottom-left map is a map of the 1900s, showing the city of Juneau and surrounding areas. The right map is a map of the year 2000, showing the city of Juneau and surrounding areas, with a legend indicating water (blue), ice (pink), and land (green). The right map also includes a scale bar and a north arrow.

Fall Activities

D.E.A.R.

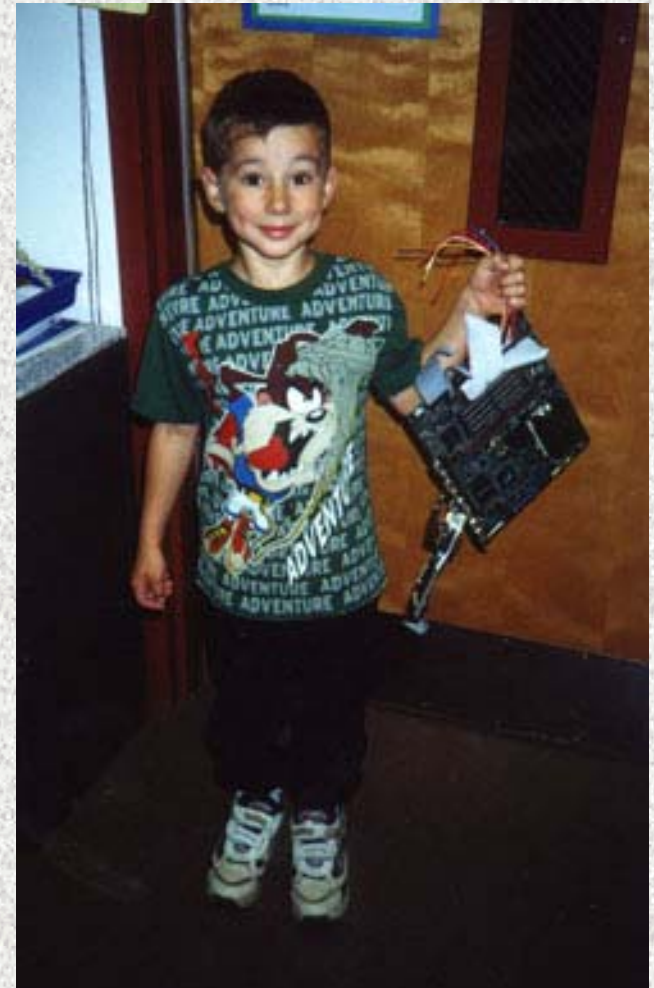

Drop Everything And
Read!

HALLOWEEN!

The Take-Apart Center:
Taking apart a computer

Fourth Grade Math:

For a unit on measurement, students create a project of their choice. These two girls measured the doll, created a pattern, cut out the material, sewed an outfit for the doll.

Fourth Grade Math:

Another measurement project:

Two students measured the distance, in meters, to all the places listed on the signpost. the signpost now resides in the first floor hallway to provide direction to any who are lost.

A rare blue-sky
day in Juneau.
Hunting for signs
of Fall.

So long from Juneau!

Love, Caryn
